

Importance of Safe Sharps Disposal

Used needles and other sharps are dangerous to people and pets if not disposed of safely because they can injure people and spread infections that cause serious health conditions such as Hepatitis B, Hepatitis C and HIV.

Pet owners who use needles to give medicine to their pets should follow the same sharps disposal guidelines used for humans.

Examples of Sharps include:

- Needles
- Syringes
- Lancets
- Auto Injectors
- Infusion sets
- Connection needles/sets

What to Do If You Are Accidentally Stuck By a Used Needle or Other Sharp

1. Wash the exposed area right away with water and soap or use a skin disinfectant (antiseptic) such as rubbing alcohol or hand sanitizer.
2. Seek immediate medical attention by calling your physician or local hospital.

Needle Clippers

Needle clippers, which are FDA-cleared sharps containers, automatically store cut needles. The remaining syringe, after the needle has been clipped, can be placed in the regular household trash. When the needle clipper is full, place it in an FDA-cleared sharps container or a strong, plastic container and dispose according to your state or local regulations **(Pictured below)**.

Proper Sharps Disposal

Do immediately place used needles and other sharps in a sharps disposal container to reduce the risk of needle sticks, cuts or punctures from loose sharps.

Do ask your medical or prescription insurer whether they cover sharps disposal containers.

Do ask the manufacturer of your drug products that are used with a needle or other sharps if they provide a sharps disposal container to patients at no charge.

Don't throw loose needles and other sharps into the trash.

Don't flush needles and other sharps down the toilet.

Don't put needles and other sharps in your recycling bin-they are not recyclable.

You can purchase an FDA approved sealed plastic container at your local CVS, Discount Drug Mart, Hursh Drug, Kroger's, Medicine Shoppe, Meijer, Rite Aid, Walgreens, and Wal-Mart for a fee (subject to change).

Once the container is full do not take it back to the store where you purchased the container.

You can dispose of the container in your regular household trash or see if there is a mail back program available.

Google to find out if the mail back program is available in your area.
